100% RECYCLED UNDERLAY

Estillon is eager to contribute toward a **healthy, sustainable** future. So we're launching a **100% recycled underlay** in the market. A 5mm-thick underlay manufactured from **100% recycled PET bottles**, suitable for household use. And once the carpet has done its job, it can simply be **recycled** anew. This is how Estillon is contributing to the **circular economy**.

We choose **green**
